

NETGEAR Insight 5.0 Offers and Features

NETGEAR
INSIGHT

The NETGEAR Insight management solution is an industry first. It offers plug-and-play set up and management of your small business network, using an easy-to-use mobile app or a cloud web portal. The Insight platform allows any business owner or IT professional to discover and setup their NETGEAR devices and monitor or manage their network. It is easy and simple. The intuitive mobile app and web interface cover any situation and preference.

NETGEAR Insight 5.x brings 3 major benefits:

1. Insight delivers unified remote management covering select NETGEAR access points, switches and storage for a complete network solution for small businesses.
2. NETGEAR Insight business owners or resellers get remote management of small business networks across multiple locations -- all from a single pane-of-glass on any device.
3. Insight provides ongoing visibility and control custom-built for the specific needs of small business networks with alerts and built-in Help and Support.

NETGEAR Insight subscription plans

NETGEAR Insight management solution comes with 2 subscription plans: Insight Basic and Insight Premium. In both plans, the number of devices and locations that can be managed are unlimited (with a subscription).

INSIGHT OFFER DETAILS	Basic	Premium
Free Devices	2	0
Monthly Fees Per Device	N/A	\$0.99
Annual Fees Per Device	\$4.99 3rd device onward	\$9.99

Insight Basic includes Insight mobile app management, and is free for the first two Insight devices on your network. Starting with the 3rd device, there is a per device, per year subscription fee of only \$4.99. The NETGEAR Insight app is free to download from the Apple® App Store® and Google Play™

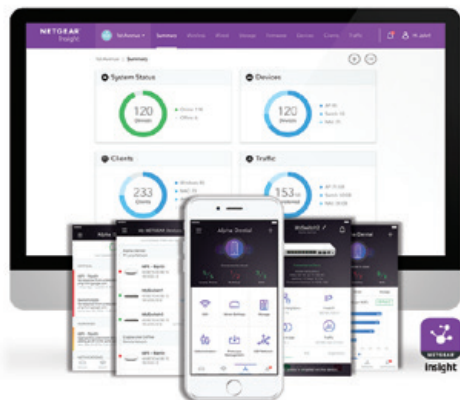

Insight Premium includes management and monitoring through both the Insight mobile app and the Insight Cloud Portal, together with additional Insight advanced features. Insight Premium comes in two flavors, a monthly per-device subscription of \$0.99 or a yearly per-device subscription of \$9.99. Insight Premium subscription fees apply to all Insight devices on the network (starting with the first device).

The Insight Premium advantage

The Insight Cloud Portal

Just as in the Insight mobile app, you can perform setup, monitoring and management through a new intuitive web portal - backed by the Insight Cloud. Through the portal, users have a single-pane-of-glass view of all their devices and their locations (multiple sites), from any device, PC, MAC, or tablet, on a larger screen, which is ideal for configuring larger port-count switches, such as the 28-port and 52-port Insight Managed Smart Cloud switches. The Insight Cloud Portal is included with the Insight Premium subscription plan only.

Feature Details for Insight 5.0	Insight Basic	Insight Premium
Insight mobile app	✓	✓

Insight advanced features

The Insight Premium subscription also comes with three advanced features for optimal configuration of your business network.

Fast Roaming and Facebook WiFi:

- **Fast Roaming:** Enhance the WiFi experience for your employees and guests by allowing their WiFi connections to seamlessly move from one Insight access point to another, without loss of their session connectivity.
- **Facebook WiFi:** Facebook WiFi allows the business customers to leverage their Facebook credentials to check into the business guest WiFi. They can also interact with the Business Facebook page to get access to free WiFi on their premises.

PoE scheduler:

- Easily setup multiple schedules/timers for your Power-over-Ethernet devices connected to your PoE Insight Switches right through the Insight mobile app or Cloud Portal.
- Schedule PoE enabling/disabling by port to ensure optimal energy conservation as well as optimal security.
- Fine-tune as needed to maintain the optimal schedules by week, day and time.
